Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-11, 21 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. Claim 1 recites a single method step without the recitation of how and what method steps are used or applied to cause damping only in the load speed control.

Claims 12-20 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. Claim 12 recites a subordinate motor speed control and a superordinate load speed control without the recitation of any means or devices to cause damping and prevent damping of the speed control. Claims 12-20 fail to particularly point out and distinctly claim the subject matter of the invention.

Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. Claims 1-22 recite method steps and control devices without the recitation of any structural cooperative relationship of the steps and devices. The claims are apparent translation from the foreign application, which the claims fail to comply with the 35 U.S.C. 112, second paragraph.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kerner (6,274,995), Lyons et al (6,196,345), Kang (5,959,422), or Lee (4,143,311).

With respect to claims 1-22, see Lyons et al figures 2, 3, and 4 in particularly elements 212 and 220.

With respect to claims 1-22, see Kerner figure 4 in particularly elements 4.2, 4.23, and 4.4.

With respect to claims 1-22, see Kang figure 4 elements 120, 130, and 140.

With respect to claims 1-22, see Lee figure 1 in particularly elements 50, 68, 69, and 72.

Citation of Pertinent References

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patents to Murakami et al (4,914,365), Ivanov et al (4,395,904 and 4,267,496), Boice (3,813,589 and 3,764,872), Graf (3,753,063), Lu et al (6,046,560), Kerner (6,127,793), Geil (2003/0124919), Kurishige et al (6,161,068), Tsutsui (6,274,994), Rundqwist et al (5,528,119), and Toyazawa et al (5,646,495) disclose damping control systems.
